

Proposal for new member in the EWGLA Coordination Board

Boglárka G.-Tóth

boglarka@inf.szte.hu

- Senior research fellow
Department of Computational Optimization,
Institute of Informatics,
University of Szeged,
Hungary.
- Ph.D. in Informatics,
University of Almería, 2007.
- Research interests:
 - continuous and network location
 - competitive location
 - rigorous solution by global optimization

I would like to continue the excellent work of the current EWGLA Board by contributing to the main tasks:

- Handle the financial resources of EWGLA.
- Link with EURO and national and international OR societies.
- Help to determine the future of “Location Theory” up to a certain extent.
- Conference and stream/section organization on location.
- Inner and outer networking of the working group.
- Welcoming young researchers, doctoral schools, winter/summer courses on location.

My main aim as a member of the board, to encourage members to actively participate on sharing any information related to location, like conferences, new articles, applications, available software or test cases.

Improve communication

- Improve the EWGLA website and make it even more useful if possible.
- Promote location related events and news on any media.
- Encourage the members to disseminate their work through the EWGLA website.

Improve the collection of resources and tools

- Encourage members to include their work in the list of location related tools and source codes.
- Encourage members to include their benchmark instances for location related problems.

I would like to thank to Sergio for his invaluable work in the EWGLA Coordination Board!!!
